

BSIL-RO-VW Vibrating Wire Portable Readout

Applications

BSIL-RO-VW Vibrating Wire Portable Readout is used to read the vibrating wire transducers and built-in thermistor temperature sensors. Entirely airproof construction allows the readout box to work in atrocious environment.

Description

BSIL-RO-VW adopts deft aluminum metal crust with good quality, advantage lithium battery to recharge and also has an electrifiable interface. With the small volume and light weight the box is easy to take.

The big screen LCD has high apheliotropism, which can reveal the readers clearly even at night. The readout box can reveal the vibrating signal and temperature of all kinds of BSIL instruments directly, The stored data can be transferred to the computer and be input in the electric form and the data-base by the communication cables.

It can measure VW instruments which connected to BSIL-RO-TB Junction Box automatically and store data.

Key Features

- Portable and rugged
- Compatible with nearly all VW sensors
- Real time display of VW sensor readings in Hz/ Digital
- Display backlight
- Readings are accurate, repeatable

Main Specifications

Model	BSIL-RO-VW
Frequency Range	400Hz~6000Hz
Frequency Resolution	0.01Hz
Frequency Accuracy	0.05Hz
Time Accuracy	0.0025%
Temperature Measurement Range	-50 to +150°C
Temperature Measurement Resolution	0.01°C
Temperature Measurement Accuracy	0.1°C
Storage	2000 nos.
Communication Interface	RS232 / RS485
Working Temperature	-10 to + 50°C
Battery	7.2V/4Ah lithium battery
Dimension (LxWxH)	166x126x136mm
Weight	1.5kg
